Phase 4 Plus Visualization Atlas

```
> 用途：对当前 package 中所有 figure 的用途、路径和引用方式做一份统一说明。
> 原则：本 atlas 既回答“哪些图被用了”，也回答“每张图在当前论证中负责什么”。

---

## 1. 为什么当前 package 需要单独的图件 atlas

当前 `Phase 4 + next-stage + next-layer` 的叙事既依赖旧的 anchor figures，也依赖这次新生成的状态/bridge

- 哪张图服务 mechanism-first；
- 哪张图服务 Group B；
- 哪张图只是 boundary/support；
- 哪张图是这次 package 新增，而不是旧项目遗留。

---

## 2. 当前 figure inventory

| code | file | package role |
```

|---|---|---| | `F1` | `results/phase4plus_figures/phase4plus_fig1_delivery_status_matrix.png` | Top-level state ladder from frozen Phase 4 to evidence-gated delivery. | | `F2` | `results/phase4plus_figures/phase4plus_fig2_cross_country_bridge.png` | Accuracy and delta profile for UK, USA, and MTUS wave-1 bridge rows. | | `F3` | `results/phase4plus_figures/phase4plus_fig3_mtus_wave1_country_delta.png` | Five-country wave-1 delta profile for current MTUS bridge evidence. | | `F4` | `results/phase4plus_figures/phase4plus_fig4_groupb_axes.png` | Employment, gender, income, and age status with structural-boundary annotation. | | `F5` | `results/phase4plus_figures/phase4plus_fig5_extension_support.png` | Trigger difficulty, contextual/hazard lift, and expanding-window negativity. | | `F6` | `results/phase4plus_figures/phase4plus_fig6_evidence_gate.png` | Default-delivery pass/hold structure and stronger-claim trigger rule. | | `FIGURE6` | `results/anchor_figures/figure6_transition_analysis.png` | Primary mechanism-first anchor for stay vs transition asymmetry. | | `FIGURE8` | `results/anchor_figures/figure8_input_info_effect.png` | Anchor figure for the claim that more history/channels do not materially improve prediction. | | `FIGURE10` | `results/anchor_figures/figure10_dimension_importance.png` | Primary social-stratification figure, but only under explicit caption boundaries. |

```
---

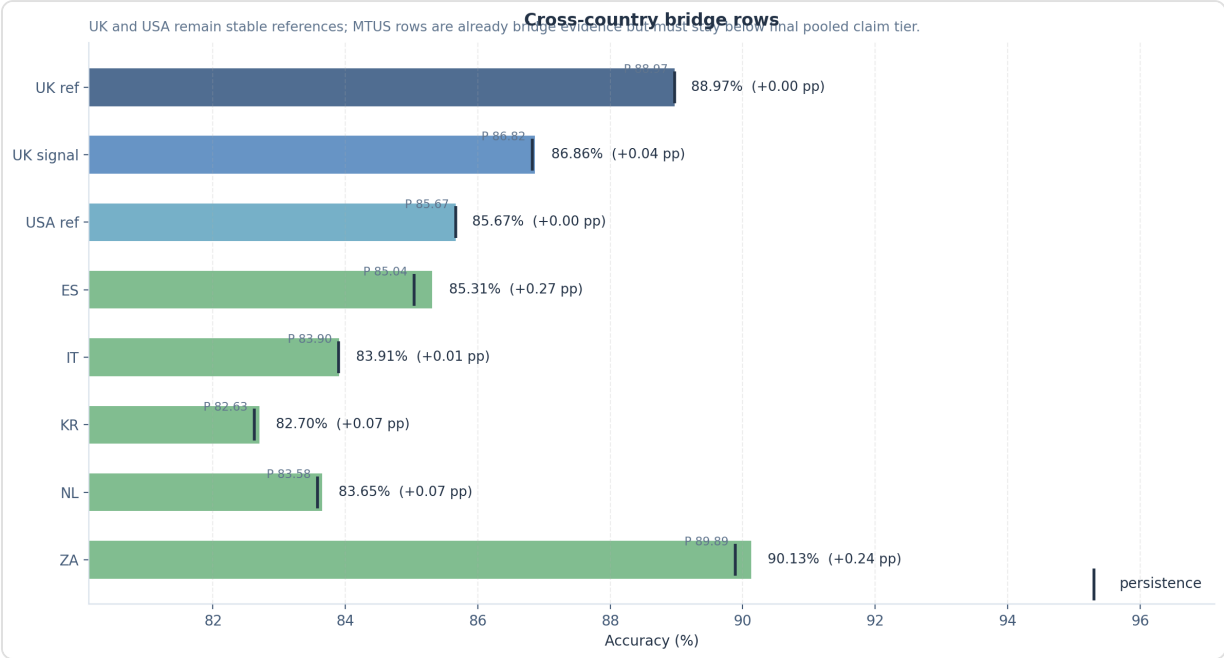
## 3. 图件逐张说明

### 1. Phase 4+ delivery status matrix
```

- canonical_path: `results/phase4plus_figures/phase4plus_fig1_delivery_status_matrix.png`
- source: `live summary jsons`
- package role: Top-level state ladder from frozen Phase 4 to evidence-gated delivery.

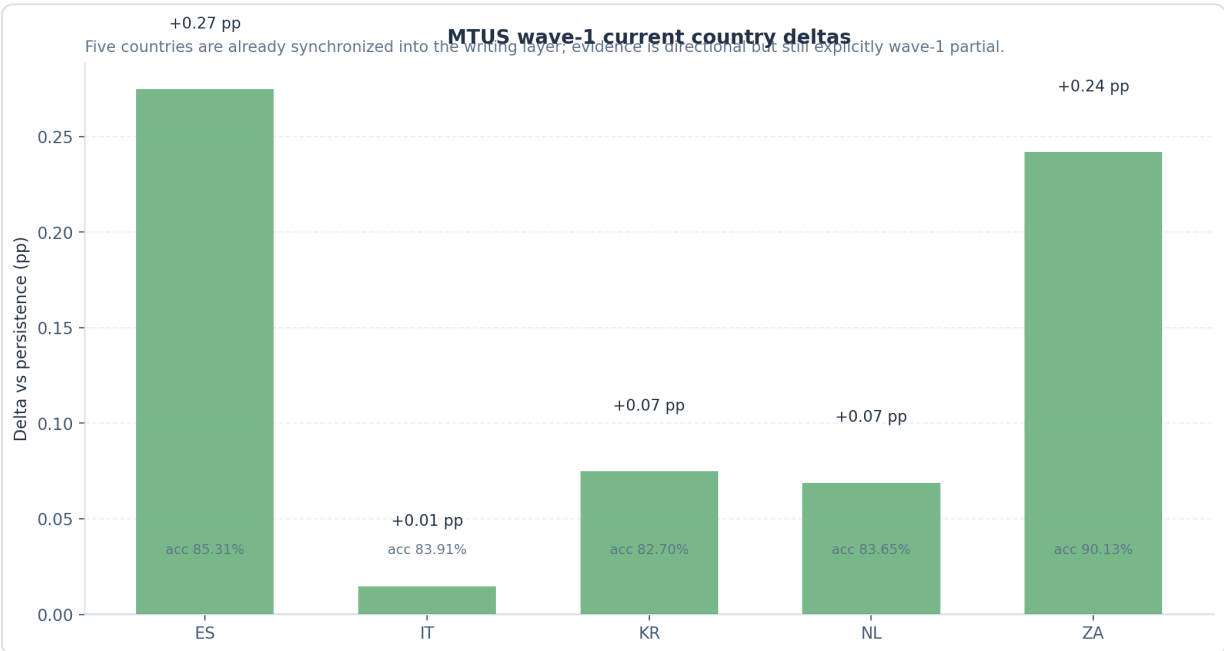
2. Cross-country bridge rows

- canonical_path: `results/phase4plus_figures/phase4plus_fig2_cross_country_bridge.png`
- source: `results/next_stage_cross_country_activity_master/summary.json`
- package role: Accuracy and delta profile for UK, USA, and MTUS wave-1 bridge rows.



3. MTUS wave-1 country deltas

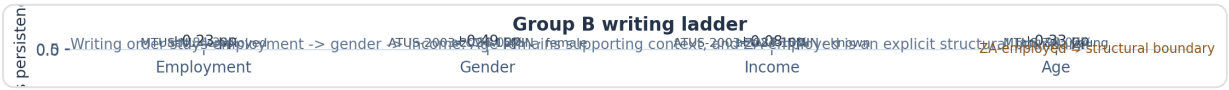
- canonical_path: `results/phase4plus_figures/phase4plus_fig3_mtus_wave1_country_delta.png`
- source: `results/next_stage_cross_country_activity_master/summary.json`
- package role: Five-country wave-1 delta profile for current MTUS bridge evidence.



4. Group B axis ladder

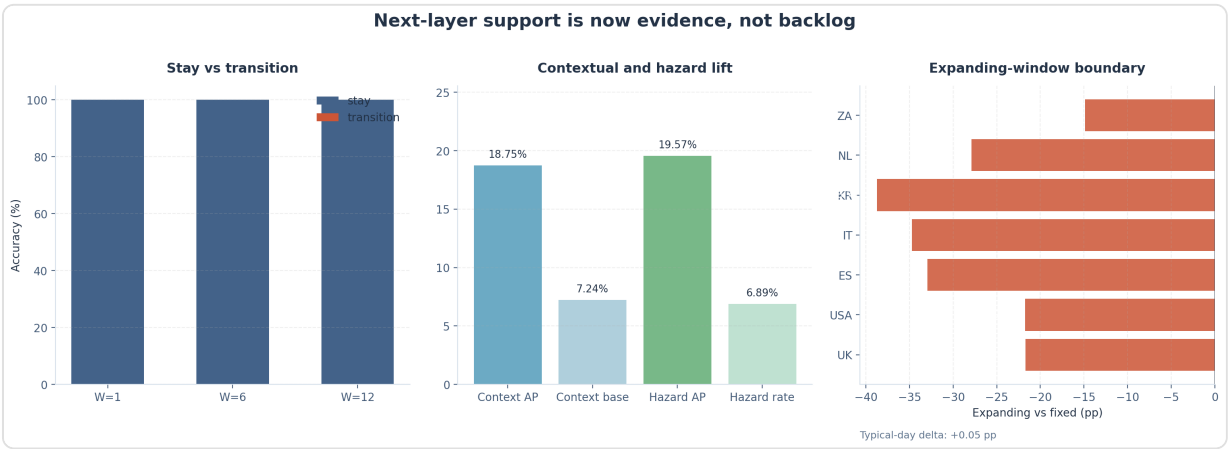
- canonical_path: `results/phase4plus_figures/phase4plus_fig4_groupb_axes.png`

- source: `results/next_stage_groupb_master/summary.json`
- package role: Employment, gender, income, and age status with structural-boundary annotation.



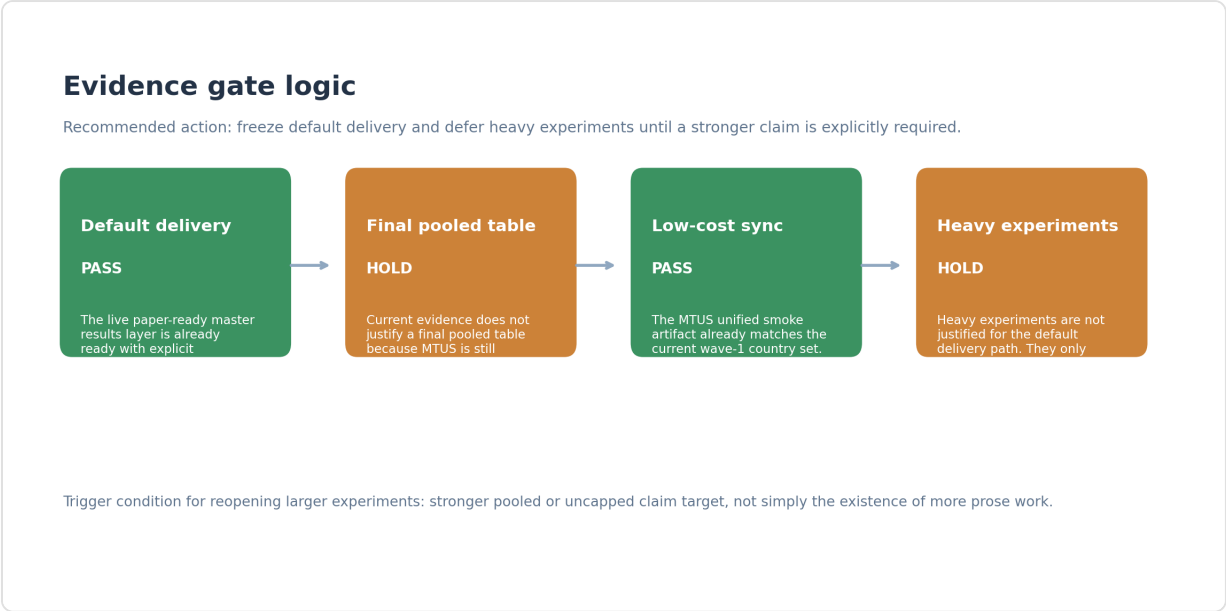
5. Next-layer support and boundary evidence

- canonical_path: `results/phase4plus_figures/phase4plus_fig5_extension_support.png`
- source: `results/next_layer_extension_summary/summary.json`
- package role: Trigger difficulty, contextual/hazard lift, and expanding-window negativity.



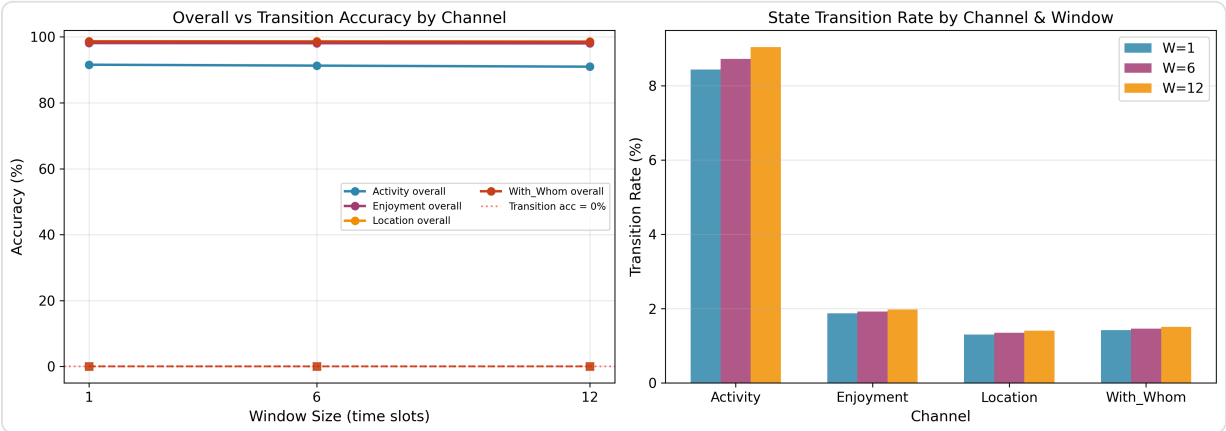
6. Evidence gate decision

- canonical_path: `results/phase4plus_figures/phase4plus_fig6_evidence_gate.png`
- source: `results/evidence_gate_decision/summary.json`
- package role: Default-delivery pass/hold structure and stronger-claim trigger rule.



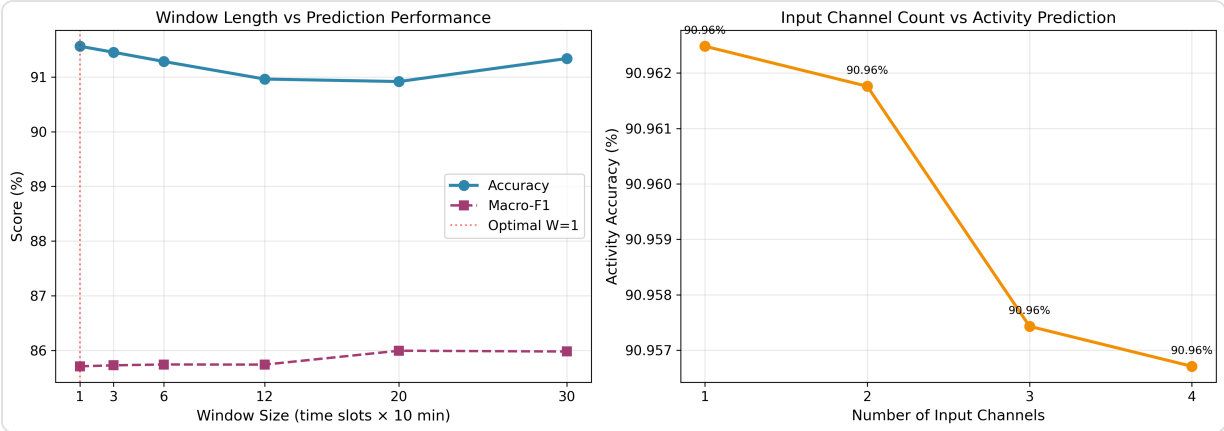
7. Figure 6 transition analysis

- canonical_path: `results/anchor_figures/figure6_transition_analysis.png`
- source: `results/figures/figure6_transition_analysis.png`
- package role: Primary mechanism-first anchor for stay vs transition asymmetry.



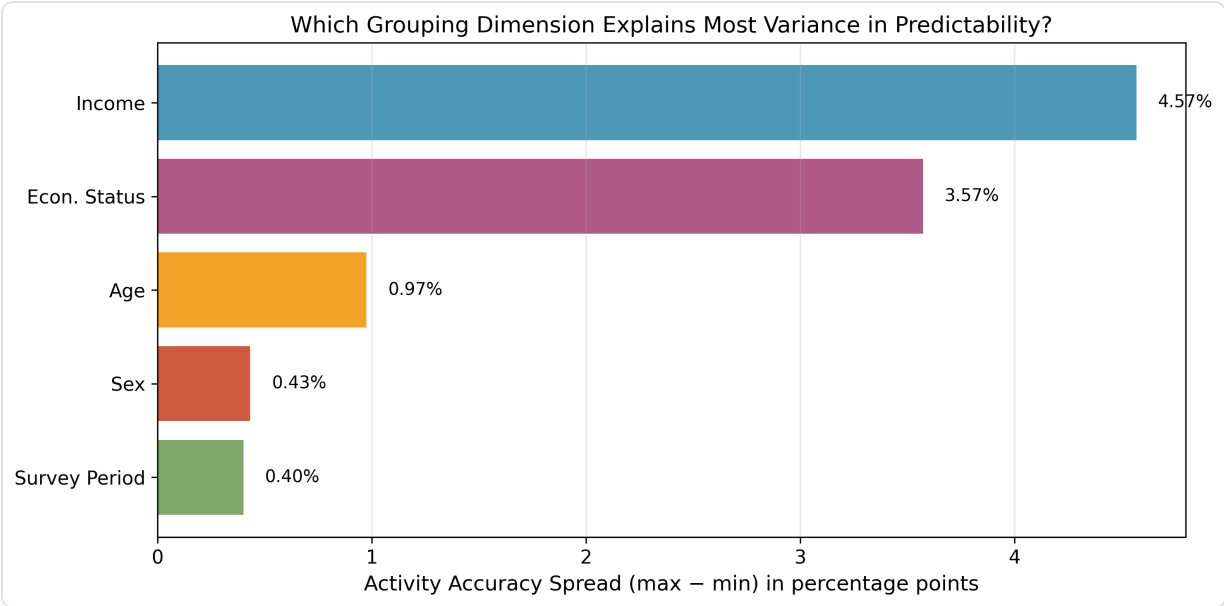
8. Figure 8 input-information effect

- canonical_path: `results/anchor_figures/figure8_input_info_effect.png`
- source: `results/figures/figure8_input_info_effect.png`
- package role: Anchor figure for the claim that more history/channels do not materially improve prediction.



9. Figure 10 dimension importance

- canonical_path: `results/anchor_figures/figure10_dimension_importance.png`
- source: `results/figures/figure10_dimension_importance.png`
- package role: Primary social-stratification figure, but only under explicit caption boundaries.



```
---

## 4. 当前 package 的图件结构

- 新生成的当前态图位于：`results/phase4plus_figures/`
- 当前 package 复用的 anchor figures 位于：`results/anchor_figures/`
- 所有原图镜像位于：`ORIGINAL_FIGURES/`

如果需要稳定引用，请优先使用 `results/...` 里的 canonical paths；`ORIGINAL_FIGURES/...` 更适合邮件、PPT
```
